REFERENCE CATALOG

ISTANBUL FINANCIAL CENTER (ISTANBUL, TURKIYE)

In the landmark Istanbul Financial Center project, our high-performance aluminum systems BM72 and BM60 were selected. Chosen to complement modern architecture with their refined aesthetics, they also ensure durability and superior energy efficiency

BM60

BM60 is a high-performance system suitable for various window and door types. It offers strong insulation, durability, and acoustic comfort.

BM72

BM72 is a high-insulation window and door system suitable for various opening types including tilt & turn, tilt & slide, and folding. It offers durability, energy efficiency, and excellent acoustic performance.

ANKARA 1071 (ANKARA, TURKIYE)

In the Ankara 1071 project, our aluminium systems BM72 and BG50 were selected. Chosen for their sleek design and advanced performance features, these systems reinforce the project's modern identity while reflecting our commitment to quality and innovation.

BG50

BG50 is a high-performance curtain wall system suitable for capped, two-sided, and unitized structural silicone glazed façades. It offers strong thermal insulation, acoustic comfort, and high resistance to wind and water.

BM72

BM72 is a high-insulation window and door system suitable for various opening types including tilt & turn, tilt & slide, and folding. It offers durability, energy efficiency, and excellent acoustic performance.

CER ISTANBUL (ISTANBUL, TURKIYE)

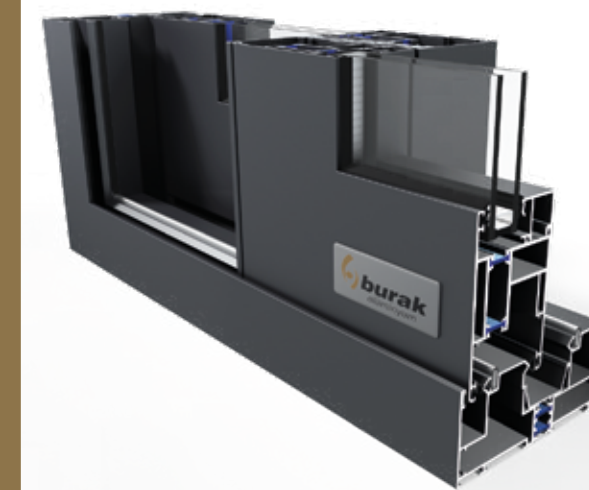

In the CER Istanbul project, where timeless architecture meets modern engineering, our BM66 and S4000 systems were selected. Recognized for their strength, elegance, and alignment with the project's premium standards, these systems highlight Burak Aluminium's dedication to excellence.

BM66

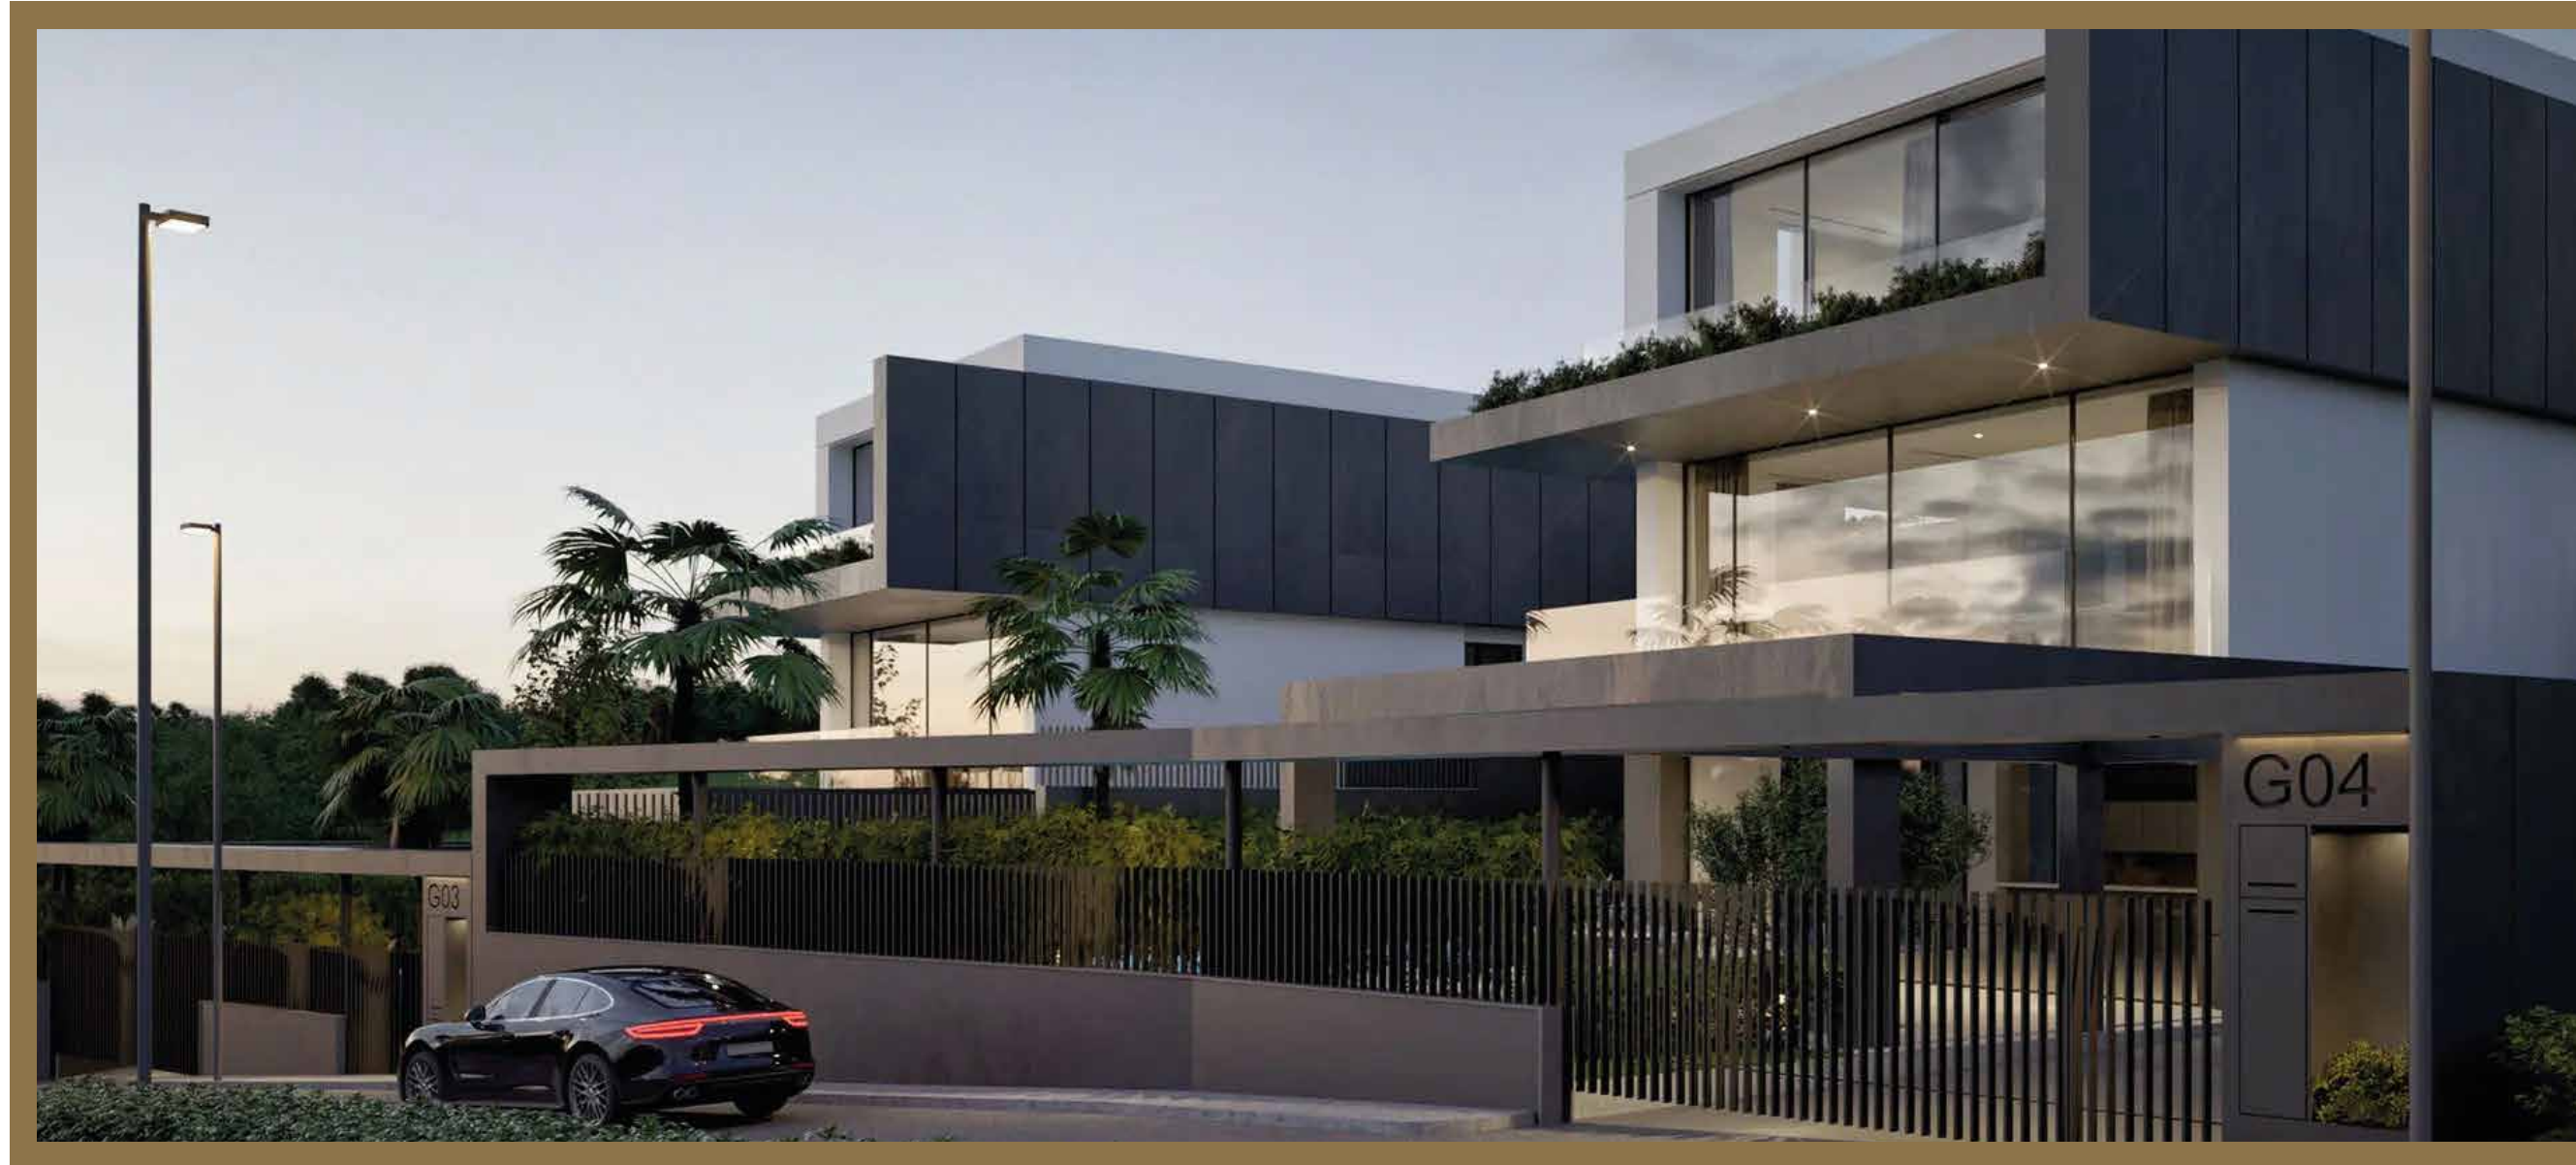

BM66 is a high-performance window and door system designed for modern structures. It delivers excellent thermal insulation, long-term durability, and effective acoustic comfort—making it ideal for both residential and commercial applications.

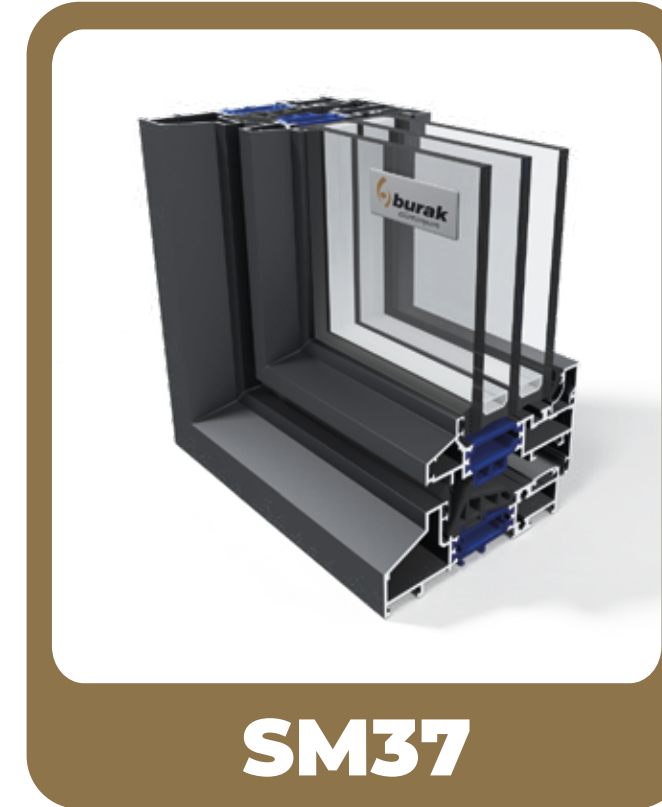

S4000

S4000 is a durable and versatile lift & slide door system, designed for smooth operation and high performance. It supports various frame configurations and offers compatibility with insect screens and multi-rail setups.

VONSTEEL VILLAS (BURSA, TURKIYE)

“In the Vonsteel Villas project, developed by Vonsteel Group with a focus on nature-inspired design and long-lasting quality, our SMARTNESS37 and MS120 aluminium systems were selected. Chosen to support both structural performance and architectural elegance, these systems underline our dedication to sustainable and refined living spaces.

SM37

BM60 is a high-performance system suitable for various window and door types. It offers strong insulation, durability, and acoustic comfort.

MS120

MS120 is a versatile lift & slide door system that combines smooth sliding performance with flexible configuration options. It supports multiple frame types, integrated insect screens, and ensures effective insulation for modern spaces.

FORUM TRABZON MALL (TRABZON, TURKIYE)

In the Forum Trabzon Mall project, a landmark shopping and lifestyle center in the Black Sea region renowned for its wavy sea-inspired roof and full-glazed coastal facades, our BG50 aluminium system was selected. Chosen to enhance both architectural allure and structural excellence, it reflects our commitment to innovation and design.

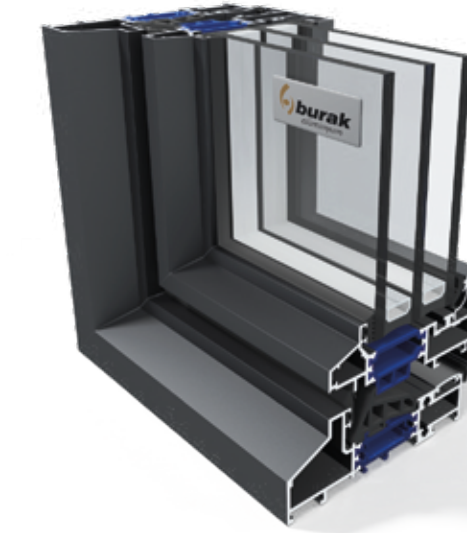

BG50 is a high-performance curtain wall system suitable for capped, two-sided, and unitized structural silicone glazed façades. It offers strong thermal insulation, acoustic comfort, and high resistance to wind and water.

EGE YAPI ORMANYAKA (ISTANBUL, TURKIYE)

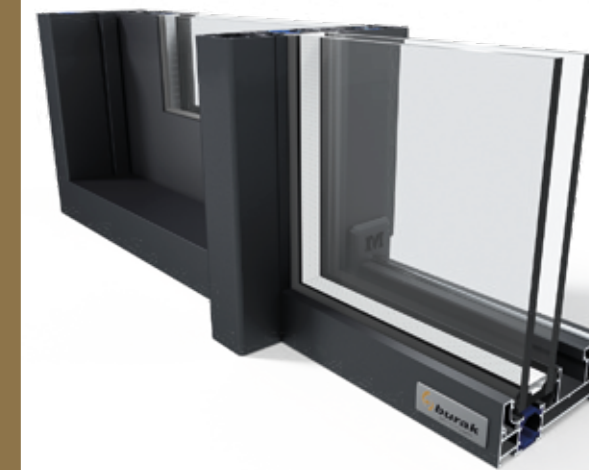

In the Ormanyaka project, which brings modern living together with nature through its low-rise architecture and expansive green spaces, our SMARTNESS37 and MS120 aluminium systems were selected. Chosen to complement the project's sustainable and refined design approach, these systems embody our commitment to innovative and nature-conscious solutions.

SM37

BM60 is a high-performance system suitable for various window and door types. It offers strong insulation, durability, and acoustic comfort.

MS120

MS120 is a versatile lift & slide door system that combines smooth sliding performance with flexible configuration options. It supports multiple frame types, integrated insect screens, and ensures effective insulation for modern spaces.

SUGARHOUSE (SALT LAKE CITY,USA)

In the prestigious Sugarhouse project in Salt Lake City, our high-performance BM72 series was selected. BM72 enhances modern architecture with its elegant design, while offering outstanding insulation properties and energy efficiency.

BM72

BM72 is a high-insulation window and door system suitable for various opening types including tilt & turn, tilt & slide, and folding. It offers durability, energy efficiency, and excellent acoustic performance.

BIG COUNTRY (ISTANBUL, TURKIYE)

In the prestigious Big Country project in Istanbul's Büyükçekmece district, our high-performance BM72 series was selected. Chosen for its elegant design, BM72 contributes to the project's modern architecture while enhancing living comfort through excellent energy efficiency and superior insulation performance.

BM72

BM72 is a high-insulation window and door system suitable for various opening types including tilt & turn, tilt & slide, and folding. It offers durability, energy efficiency, and excellent acoustic performance.

HEYDAR ALIYEV CENTER (BAKU, AZERBAIJAN)

At the Heydar Aliyev Cultural Center, the BG-60 Curtain Wall System was applied to meet high architectural demands. With a 60 mm profile depth and 2–4 mm wall thickness, it ensures durability and structural performance. The system provides precise adaptation to the building's complex façade geometry.

The BG-60 Curtain Wall System is a high-performance façade solution designed to meet modern architectural demands with strong thermal insulation and air-water tightness.

THE CENTAURUS (PAKISTAN)

At The Centaurus project, the BG-50 Silicone Curtain Wall system was utilized to meet modern façade requirements. With a 50 mm profile depth and 1.6–2.5 mm wall thickness, it ensures durability and structural reliability. The system provides a sleek appearance while adapting seamlessly to the building's architectural design.

BG50 is a high-performance curtain wall system suitable for capped, two-sided, and unitized structural silicone glazed façades. It offers strong thermal insulation, acoustic comfort, and high resistance to wind and water.

SHAQLAWA HOTEL (IRAK)

At the Shaqlawa Hotel project, the BG-50 Façade System was used to deliver high-performance curtain wall solutions. With a 50 mm profile width and 1.6–2.8 mm wall thickness, it ensures durability and structural strength. The system enhances the building's appearance while providing reliable and long-lasting performance.

BG50 is a high-performance curtain wall system suitable for capped, two-sided, and unitized structural silicone glazed façades. It offers strong thermal insulation, acoustic comfort, and high resistance to wind and water.

PARK WIEV (IRAK)

At the Park Wiev project, Burak Alüminyum implemented insulated and uninsulated hinged systems to meet diverse architectural needs. With a 55 mm frame depth, 64.5 mm sash depth, and 1.6–2 mm wall thickness, the system ensures durability and reliable performance. It provides both functional flexibility and a refined appearance, enhancing the overall quality of the building.

The BM55 system is a high-performance hinged door and window solution offering strong thermal insulation and air-water tightness for enhanced indoor comfort.

KUWAIT CITY (KUWAIT)

At the Kuwait City project, Burak Aluminum provided both insulated and uninsulated hinged systems along with a high-performance curtain wall solution. The hinged system features a 55 mm frame depth, 64.5 mm sash depth, and 1.6–2 mm wall thickness, while the curtain wall system offers a 50 mm profile width with 1.6–2.8 mm thickness for enhanced durability.

BG50

BG50 is a high-performance curtain wall system suitable for capped, two-sided, and unitized structural silicone glazed façades. It offers strong thermal insulation, acoustic comfort, and high resistance to wind and water.

NEW YORK (USA)

BG50

BG50 is a high-performance curtain wall system suitable for capped, two-sided, and unitized structural silicone glazed façades. It offers strong thermal insulation, acoustic comfort, and high resistance to wind and water.

BM66

BM66 is a high-performance window and door system designed for modern structures. It delivers excellent thermal insulation, long term durability, and effective acoustic comfort making it ideal for both residential and commercial applications.

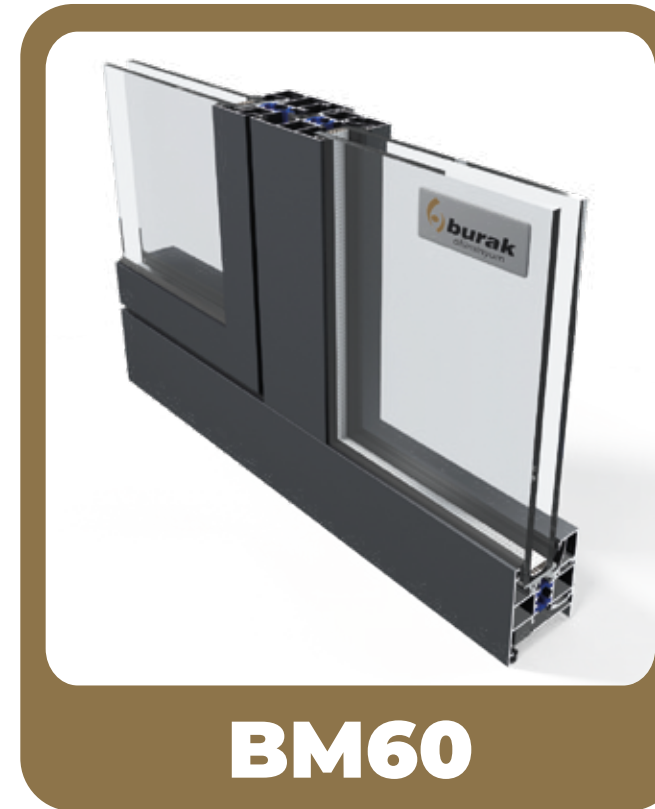

NEW YORK (USA)

BM66

BM66 is a high-performance window and door system designed for modern structures. It delivers excellent thermal insulation, long term durability, and effective acoustic comfort making it ideal for both residential and commercial applications.

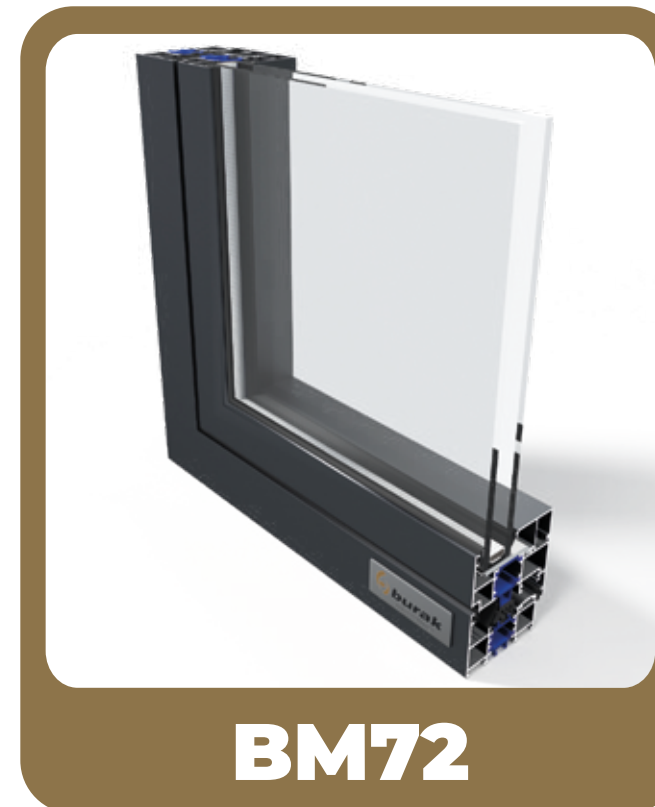

NEW YORK (USA)

BM60

BM60 is a high-performance system suitable for various window and door types. It offers strong insulation, durability, and acoustic comfort.

NEW YORK (USA)

BM72

BM72 is a high-insulation window and door system suitable for various opening types including tilt & turn, tilt & slide, and folding. It offers durability, energy efficiency, and excellent acoustic performance.

NILE SOURCE BUILDING (ADDIS ABABA)

At the Nile Source Building project, Burak Alüminyum supplied high-performance aluminum façade systems designed for durability and precision. The applied solutions ensure long-lasting performance while enhancing the building's modern architectural appearance.

BG50

BG50 is a high-performance curtain wall system suitable for capped, two-sided, and unitized structural silicone glazed façades. It offers strong thermal insulation, acoustic comfort, and high resistance to wind and water.

BM55

The BM55 system is a high-performance hinged door and window solution offering strong thermal insulation and air-water tightness for enhanced indoor comfort.

THE LYRIC LOFT (TEXSAS, USA)

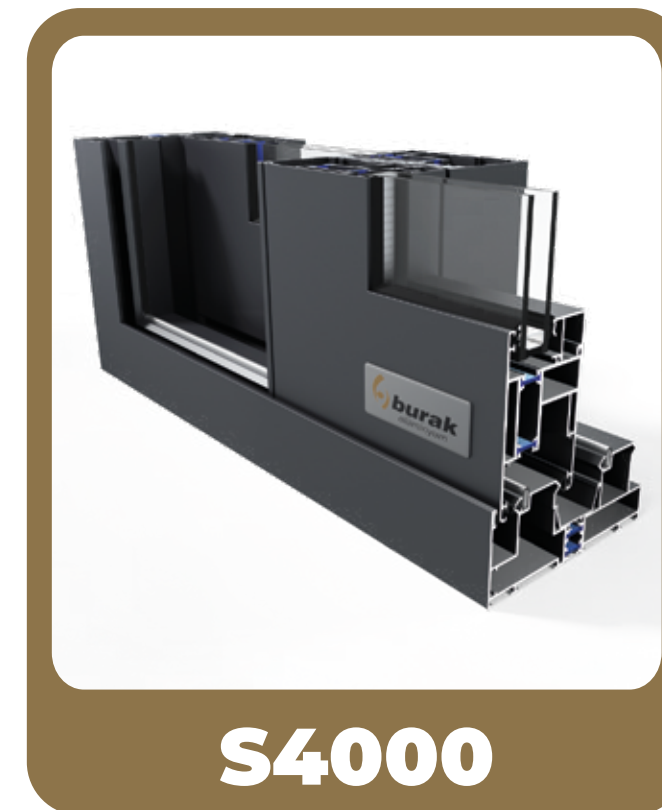

At The Lyric Loft project, Burak Alüminyum contributed advanced aluminum extrusion solutions tailored to modern architectural needs. The applied systems ensure durability, precision, and long-term performance while complementing the building's contemporary design.

BM72

BM72 is a high-insulation window and door system suitable for various opening types including tilt & turn, tilt & slide, and folding. It offers durability, energy efficiency, and excellent acoustic performance.

S4000

S4000 is a durable and versatile lift & slide door system, designed for smooth operation and high performance. It supports various frame configurations and offers compatibility with insect screens and multi-rail setups.
